Remarkable Co-existence of These Three Commodities.

IRON COUNTY RESOURCES

IMPORTANT ENTERPRISE IN VIEW FOR THIS LOCALITY.

Antelope Island Copper - Strong Ledge of Red Metal In Great Salt Lake—The Morning Call—The Af-ternoon Call—The New Exchange -Silver Park-Plymouth Plant.

Fred Larch, the emineut coal and irot expert, has returned from Iron county.

Mr. Lurch, who is representing local mining men and eastern capitalists and lows:
investors, has spent the last six months in southern Utah investigating into the fron and coal resources of that regio fron county, which region, he states,

trum and coal resources of that region confining his inquiries very largely thron county, which region, he states, it puly remarkable in the mineral resources, and especially so in its almass mexhaustible quantities of coal am treat, and their close proximity, one the other, was in the way of a revelation to him, as he states that he had wished this and other countries an never yet, in all of his experience found a locality where iron, coal and lime for flux abounded in commercia quantities within a radius of threatiles. This combination, he states, in found in Pinto iron district, the irot being in the Iron mountain, with a lime stone capping, while he has discovered a vein of anthractic coal within threatiles of the iron.

Of the inter, associated with Colone S. B. Minor of this city, R. B. Dear of Duluth, Minn, and others, he has acquired by location and purchase seventeen claims, while of the anthracite he ways 480 acres, in addition to this, Mr. Lurch has bonds and options as well as interests in over 1,000 acres of bituanians coal lands up Con Creek canyon just back of Cedar City, and this coal estates, cokes well, although it runs taker high in ash, but he is of the opinion that with greater depth this excess will greatly diminish.

Mr. Lurch will be absent from Dial a few days on business with his people and while nothing definite has been decided upon as yet as to further operations, he admitted to a representative of The Herald that it was quire likely that the probability that later on how and steel works would be erected, thus forming the nucleus for great found; each machine abons and manufacturing plants, the asgreyation meaning the tube of the productions of pig from wifth the probability that later on how and steel works would be erected, thus forming the nucleus for great found; each machine abons and manufacturing plants, the asgreyation meaning the poundaines machine abons and manufacturing plants, the asgreyation meaning the prespective and progression for thas section such as well ong app p

ANTELOPE ISLAND COPPER. Strong Ledge of the Red Metal Foun

In the Great Salt Lake. The recent strong and persistent of mand for copper has greatly stimulated the search for the red metal in this intermountain region, and in Utah the prospector and the mine owner is continually on the qui vive for this commodity, the result being that hardly a day paisses but that news is received of the discovery of mines of copper from every point of the compass, and no eaction or portion of the state is being overlooked by those in search of this popular metal.

Anticlops island, so costly enseoneed in the bosom of the Great Salt Lake. Anticlops island, so costly enseoneed in the bosom of the Great Salt Lake, is even subjected to the pring eyes and the sharp pick of the prospector, the result being that discoveries have been made there of late, which, if is believed, will eventually materialize into bonauxa propositions.

will eventually materialize into bonanza propositions.

George Frary, George Payne, Albert Richier and Briant S. Young are among the fortunate ones who have turned their attention to the inviting shores of Antelope Mand, the result being that they have located a group of five claims on its west side, about half a infle north of "Elephant Head," a well-known landmark, within the suvironments of their here is a 25-foot ledge of copper bearing ore, which crops boldly in places, and from which a hundred, and the discussions fairly well, and yell, and yel places, and from which a hundredpound lot of samples taken a short
time ago, an average assay, made at
the Union assay office in this city, disclosed matallic values of five ounces,
silver, 80 cents in gold and 150 percent in copper to the lon, a most gratsilving and promising showing and it
is believed that when it becomes gracesilv known that copper abounds in such
quantities in this locality that the island will be the scene of wild excitement, and that mining men, prospectors
and investors will invade its peaceful
shorts by the hundreds.

Already an option has been given on a
one-fifth interest in the group of five

Already an option has been given on a con-fifth interest in the group of five viains located by Frary et al., the option being for \$4,000, and the life of the been being for a period of two weeks, expiring next Monday, and, if taken up, the conditions are such that practically all of the purchase price will be not hask into the ground in the performance of development work.

The are is a splendid concentrating proposition and carries matice copper through and through mineral carrying such metallic values as disclosed by the assay above aliuded to being a shipping proposition from the start.

The Herald is informed that this copper prospect will be worked in a thorough and extensive manner in the near future.

THE MORNING CALL.

Numerous Sales and Former Quotations Well Maintained.

The morning call of the old exchang was well attended yesterday, and a great deal of interest was taken in the proceedings of the hour, the tone of th market being upward, a number of ad-vances being chronicled in which a number of old-time favorites parties

The initial sale was posted by Chie-ride Point, which changed hands at the dollar mark, being the lowest figure at which this stock has made transfers for ited dealer at \$1.5c. white Daly-West scored gains, and was a dealer at \$15.15. Four Aces held its own in good shape, and was sathered in at 37 and 37½ cents. Lower Mammoth deing business at 76 and 78 cents, while Mammoth was traded in at \$1.5c. Northern Light was firmer and recorded gains, the closing sale being posted at 68 cents. Investors were cut after \$1 ar Consolidated, while the bears exhausted every ruse to break this popular Tintic stock, which touched \$1.15 in the way of sales. Eagle & Bine Itell was a dwaler at \$1.55½ and \$1.55½, Godden Eagle being picked up at 7½ cents. Golden Star was wanted at 12 and 12% cents, Joe Bowers at 15 and 16½, and Joe Bowers Extension at a cents a block going at \$15, buyer 60. Other securities received recegnition at the hands of the stock-buying public, and were in good form.

old workings of which are being cheaned out under the management of C. E. Loose.

According to Mr. Wheeler, the long 760-foot tunnel is now nearly cleaned of all debris to its face, and he states that for the last 150 feet a two-foot body of solid first-class silver and lead ore has been disclosed along the tunnel workings, which, without doubt, places the mine on a shipping basis whenever the company decides to begin ore extraction.

According to all information obtainable a winne of thirty odd feet exists hear the face of the tunnel, in the bottom of which there is a four-foot body of high-grade ore. This winze is now choked up from a cave-in from above, and as soon as it is cleaned out, which will probably be by the list of the menth, and if it is found that the ore is there in paying quantities as represented, it is more than likely that the management will inaugurate permanent workings at this point, sinking a shaft from above to connect, and it would not be necessary to sink very far, so it is claimed in order to supply an outlet from the surface, as there is an upraise from the face of the tunnel for some distance.

From all indications, the Silver Park will in due time rank among the big mines of that end of Tintic district.

Plymouth Pumping Plant.

Plymouth Pumping Plant. W. J. Gray, the well-known machin W. J. Gray, the well-known machin-ist and mill builder, who has just re-turned from Silver City, informs The Heraid that he has just completed the Installation of a pumping plant for the Plymouth Rock Mining company, and that the works have started up in a most satisfactory manner, the mine having already been unwaiered, and to such an extent that drifting on the vein has been resumed on the 305-foot level, the outlook for this valuable and promising ground being most gratify-ing.

promising ground being most gratifying.

The water taken from the mine workings is of excellent quality, and it is understood that the company is considering the feasibility of the crection of a tank for its storing, as it can be utilized in a variety of ways, and abounds in such volume, it is stated, that from this source the town of Sliver City could receive an adequate supply for all necessary purposes.

The Wachusett Mine.

Word was received yesterday from Word was received yesterday from Lion hill that excellent progress is being made in the development of the Wachusett group, and that the tunnel being driven in its exploration has already been forced into the mountain for a distance of 120 feet. The tunnel was started on a three or four-inch vein of chloride ore, which has gradually widened out, until now, in the face of the workings, it is from eighteen to twenty inches in width, the ore carrying average values of about sixty ounces in silver and a few dollars in gold to the ton, although the values frequently run up to 130 and 150 ounces in the white metal. As the face of the tunnel is now in much softer ground, the believed that the outleak is most

Mining Notes and Personals.

The well known firm of Clark-Eldredge & Co., has declared a dividend of 2 per cent, payable today.

W. W. Chisholm and W. W. Bradley, Centennial-Eureka officials, inspected this Eureka bonanza yesterday.

It is learned that the Morning Glory company, operating in Thite district, is soon to embellish this valuable ground with a steam hoist and pumping plant.

Roy Mayne, who has returned from a visit to Tintic haunts, states that he has started permanent work in the development of the Sunbeam Extension, and that a shaft is being sunk on the ledge as rapidly as possible.

BACKACHE.

Mrs. Pinkham speaks earnestly to women suffering from this discouraging complaint.

Backache is one of the most common of woman's troubles and one of the most

It is not an acute pain, but a most distressing, wearying sensation, making work almost impossible and indicating disease of the feminine organs. A common mistake is to treat backache

in women with local external applications, calling it "a little spinal irritation" or a "touch of rheumatism."

Do not be deceived; your backache means serious trouble for you unless the cause of it is removed. All uterine and ovarian diffi-

culties are relieved by Lydia E. Pinkham's Vegetable Compound. Such relief progresses in almost every case to a complete cure-With relief of these troubles backache disappears.

Mrs. M. E. MULLER, 16 Franklin St.,

Providence, R. I., writes: DEAR MRS. PINRHAM: — I have been using Lydia E. Pinkham's Vegetable Compound for backnehe. The pain was something dreadful: at times I could not walk straight. Now I am all right and enjoy good heaith. I feel like a new woman. You do not know how thankful I am that I have got my health back, and I have you to thank for it. Your medicine is the beat that I have ever used. I advise all ladies to try it, and I am sure it will give unbounded satisfaction. I will recommend it to every friend I have.

Miss LIZZIE KOELLA, 529 Tecumseh St., Toledo, Ohio, writes:

DEAR MRS. PINKHAM:—I cannot praise your Vege-table Compound enough. For about a year I was sick with the backache. I could not work, could not sleep at night, and did not care to live. About two months ago I saw your advertisement in a paper, and thought I would try your Compound.

To-day I feel like a new person. I am just enjoying health; never felt so good in my life. I have recommended your Vegetable Compound to many of my friends, who are now using it, and think it is just splendid.

A woman of experience in these matters understands women, and Mrs. Pinkham of Lynn, Mass., has a wider experience than any physician, male or female. She offers you her counsel free of charge, and it is a friendly, sympathetic counsel. No man sees your letter or its answer at any time, and to secure the best advice it is necessary that you should be perfectly frank, this you can be to one of your own sex.

Speaking of Father Crafts, he said:
"I have known him for many years He is proposed to takin steps to bring suit against the city of Nashville for the acts of her policement known in the northwest, where he has labored among the Indians for many years. He comes from an old Duich family, and is president of the Sons of the American Revolution. He is one of the most realizing pricesses of the church."
